DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a system for positioning a stent in a patient, classified in class 623, subclass 1.11.
- II. Claims 12-20, drawn to a method for positioning a stent in a patient, classified in class 623, subclass 902.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different product, or (2) the product as claimed can be used to practice another and materially different process of using that product. (MPEP § 806.05(h)). In this case the product as claimed can be used to practice another and materially different process, such as a system does not include a transceiver mounted on the catheter. The method of invention II does not recite the steps necessitating the need to evaluate a return signal to determine the relationship between the stent and the bifurcation, and therefore is not limited to be performed by the system of invention I. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different sub-class, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3734

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor X. Nguyen whose telephone number is (571) 272-4699. The examiner can normally be reached on M-F (8-4.30 P.M).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hayes can be reached on (571) 272-4697. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
